

RECYCLE STEEL!

Recycling is easy all you do is you put steel cans in the box.  Then it goes in a Van  It goes to the centre.  Then it gets melted  and taken to the manufacturer to be put in a mold  and goes to a shop. 

Steel can be made into a , ,  and a .

To put them in the bank you first have to rinse them and then put them in a bag or box. Then if you put them in a bag then you take them to the Banks but if there in the box the lorry picked them up.

Steel is a 100% recyclable
Recycle and then the world will
be a better place
